HUFLIT

At here, I learned about **MS SQL and C# programing**. I use **.Net** to do project exercises. In third year, I taught myself **NodeJS and ReactJS** to do project exercises. In final year, I taught myself **Flutter** after working with it until now.

Employment

Information Technology Staff	**Feb 2023 - Present**

ONSKY HEALTH INTERNATIONAL, VIETNAM

About Flutter

- I'm currently Flutter developer. I can build Android, iOS and Web from scratch. I manage state with Provider(I also know about Bloc). I use websocket and mqtt to communicate with our IOT devices. I use SDK's VStarCam to integrate their cameras. These applications are available on Google Play and App Store.
- I have experience with notifications(FCM), charts(fl_chart), api (http,chopper), responsive app for Desktop,Tablet,Phone, webview for Android, iOS app ...
- I have experience in publishing apps on Google Play and App Store
- I know deeplink with go_router
- I know CI/CD with Fastlane
- I know Unit Test, Widget Test, Integrate Test
- I know integrating Flutter to existing app
- I know platform-channels
- I know Code Push(Shorebird) to upgrade app

About Android

- I work with colleagues to maintain Android app. I use SDK and documentation's VStarcam to integrate their cameras.
- Skills in the Android: mqtt, retrofit, webview ...

About React

- I have experience with React in projects during my final years of college. I use MERN stack to do project exercises. I also know a little about web3. These projects in my link Github.
- Currently, I have some projects freelance with Nextjs.
- Skills: MUI, Taiwind css, react router, react query, ...

About IOS

- I'm learning the Swift language myself so I can work with iOS
